Equipment & Project Overview

New equipment, refurbished systems and a clear starting point for your bowling project.

XSY BOWLING combines its own manufacturing capabilities, imported-equipment refurbishment and project services. This guide summarizes the business scope confirmed for the homepage preview.

Three core equipment categories

Equipment	Status	What to review
SES STRINGPIN	New equipment	Site, configuration and current technical requirements. Formerly presented as AIbowling.
AMF	Refurbished imported equipment	Original model, actual condition, refurbishment work and included systems.
Brunswick	Refurbished imported equipment	Model, equipment identity, refurbishment scope and interface compatibility.

Support around the project

Initial site and layout discussion; equipment configuration; shipment and installation coordination; operation and maintenance training; technical and spare-parts support. Responsibilities and on-site scope are agreed for each project.

Prepare for an initial discussion

1. Country, city and venue type.
2. Floor plan or available dimensions and target lane count.
3. Project stage, approximate schedule and operating plans.
4. For an upgrade: current machine, scoring system and photographs.
5. For parts: original model, part reference or a clear description of the issue.

No fixed dimensions, prices, lead times, certifications or performance ratings are stated in this preview guide. Confirm the current technical proposal and quotation before ordering.
