Refurbished Equipment Review Checklist

For a discussion about AMF or Brunswick equipment. Match the records to the actual units quoted.

Review area	Items to record or confirm
1. Equipment identity	Original brand and exact model; identity of the offered units; actual condition and photographs.
2. Refurbishment scope	Inspection findings; repair or refurbishment work completed; parts replaced and parts retained; any pending work.
3. Operation and testing	Agreed test scope; relevant operating video and records; outstanding issues; acceptance criteria and handover checks.
4. Complete component list	Pinsetters, ball-return system, lanes and foundation, scoring and displays, gutters and capping, accessories and spare parts. Identify new or refurbished status for each applicable item.
5. Delivery and support	Shipment scope, site preparation, installation, commissioning, training, spare-parts arrangements, warranty terms and exclusions.

Useful questions for the quotation

Does the offer identify the actual equipment?
Which items are new, refurbished, retained or excluded?
What evidence supports the condition and tests described?
Which installation and support responsibilities are included?
What remains to be confirmed before production or shipment?

Project / equipment reference

Project: _____
Equipment / model: _____
Questions to clarify: _____

This is a buyer planning checklist, not an inspection record or a certificate for any equipment. The actual refurbishment process and contractual scope must be confirmed for each offer.

Prepared from the owner-confirmed XSY business scope and current public XSY website materials. No third-party performance claims are adopted.
